

**Amendments to the Abstract**

Please **amend** the abstract to read:

-- A photoelectric transducer ~~(12)~~ comprises a board ~~(8)~~, which carries at least an optical sensor ~~(9)~~ on one face, and a spacer ~~(7)~~ defining a recess that houses the optical sensor ~~(9)~~. The recess is at least partly filled with an optical glue ~~(11)~~. To mount the transducer ~~(12)~~ in an optical pick up for an optical disk, the spacer ~~(7)~~ is fastened to an optical body ~~(1)~~ of the pick up. --
